Re: CAS Asset Management - Letter of Recommendation

Dear Bill:

As the President of Morris Engineering, I am pleased to write this letter of recommendation for CAS Asset Management. Our companies have worked together on various projects for over 9 months, and it has been a pleasure to work alongside you in completing those tasks.

From the beginning of any project, the professionalism and work ethic of CAS Asset Management is evident, which is a direct reflection on its owner and President. Each task is carefully thought out and performed, with an eye towards the ultimate goal of the client and the project. CAS Asset Management pays careful attention to detail, which is a critical component of performing inspections for HOA's and CDD's as well as other property owners, in order to identify potential liabilities. There is no stone left un-turned when those inspections are being performed by CAS.

The outstanding service doesn't stop at merely identifying the issues that may be present, CAS takes a practical and reasonable approach to finding solutions to issues that are presented to them, often times leading to significant cost and time savings to our clients.

It is this blend of a professional and service-oriented attitude and a strong work ethic to get the job done the right way that sets CAS Asset Management apart from other real estate inspection and management consulting companies. We highly recommend Bill and the rest of CAS Asset Management for any project, and plan to continue our business partnership well into the future.

Sincerely,
MORRIS ENGINEERING AND CONSULTING, LLC

Matthew J. Morris, P.E.
President
